Summary

I am a Web Developer who has taught myself HTML, CSS, and JavaScript. I love Ember.js, especially Octane, and have several ongoing projects in both Octane and React.js. I have been mentored for the last 12 months by a more experienced developer and have learned more than I ever thought possible. I have loved contributing to open-source projects and enjoyed the connections I have made. Highly motivated and looking for my first opportunity.

Experience

Front-End Developer Internship

Design Monster LLC

Jan 2020 - Present (11 months +)

I started an internship with this company helping with design aspects and am given a specific task via Jira, now this could be a task that takes a day, a week, or a month depending on what it is. It is giving me a great start on working with tickets and learning how to work in a team.

Open Source Contributions

Ember.js

Apr 2020 - Present (8 months +)

While working full-time and teaching myself to code, I started on some open source contributions and writing blog posts for The Ember Times. This helped me learn Git and GitHub, work with a team, and help the open-source community. There are some links below to my contributions and blog posts!

Inbound Coordinator

Cole Haan

Feb 2017 - Oct 2020 (3 years 9 months)

- * Support business and make decisions guided by policies, procedures, and own business plan that impact the efficiency and effectiveness of its own unit and other units with interrelated processes.
- * Provide the tools and training to ensure employee success. Coach and counsel employees on daily and weekly performance. Communicate performance to supervisor.
- * Coordinated and work alongside full-time and temporary help daily, including training, monitoring performance, assigning work, and reporting performance to supervisors and managers.
- * Monitored morale and assisted in the motivating of teammates.
- * Responsible for using Warehouse Management System (WMS) for Receiving, Shipping, Picking, track cartons, etc. Assist in managing a consistent flow of work throughout the DC.

Mechanic

Nissan Motor Corporation

Jan 2015 - Feb 2017 (2 years 2 months)

Technician

Nissan 2015-2017

- * Diagnosed complicated mechanical problems utilizing schematics and diagrams to ensure issues were fixed and customers were happy.
- * Worked on simple projects from oil changes to brakes, and more complicated projects such as transmission replacement which included digital reprogramming of core systems.

Material Handler

SIG SAUER, Inc.

Mar 2013 - Feb 2015 (2 years)

Material Handler

Sig Sauer 2013-2015

- * Earned certification in forklift operations and was responsible for maintaining proper safety protocols.
- * Trained in Oracle Programming System that integrated, full-stack solutions to run crucial customer workloads faster.

Education

freeCodeCamp

Certifications, Web Development

2019 - 2020

- * Earned Responsive Web Design Certificate (300 Hours)
- * Earned JavaScript Algorithms and Data Structures Certificate (300 Hours)
- * Earned Responsive Front End Libraries Certificate (300 Hours)

Skills

Ember.js • React.js • JavaScript • GitHub • Open Source Software
